

Vladimir Sîrghii

WEB DEVELOPER

WORK EXPERIENCE

WEB Developer

April 2023 - June 2023

Renter e Bike Prime SRL, Chişinău, Moldova

As an intern at Renter e Bike Prime LLC, I had the opportunity to work on the development of an engaging website. My main responsibility was creating the required components in accordance with the specified design. This experience helped me develop my skills and knowledge in the field of web development.

One significant aspect of this opportunity was getting acquainted with technologies like React.js, TypeScript, and many others. I had the chance to explore and familiarize myself with these powerful development tools widely used in the industry.

Working at Renter e Bike Prime LLC, I was involved in a dynamic and challenging work environment. I collaborated with an experienced and dedicated team that provided guidance and support throughout my internship. I had the opportunity to learn from my colleagues and contribute to ongoing projects.

During the three months spent at the company, I gained practical experience in web development, particularly in component creation and design implementation. This experience provided me with a solid understanding of web development processes and practices, as well as a strong foundation for my future employment in the technology field.

Renter e Bike Prime LLC offered me valuable internship experience that helped me develop my skills and knowledge in web development. I am grateful for this opportunity and for the wonderful team I worked with.

Self-training in the technological field

At present

I am currently working on creating a portfolio website using the Django framework. This position involves developing and implementing the necessary functionalities to create an interactive and appealing website. Leveraging my knowledge of Django, I collaborate with the team to create a smooth and well-structured user experience.

In addition to working with Django, I am dedicated to intensively studying the Python programming language. I am expanding my knowledge and skills in this versatile language, which helps me develop efficient and well-organized solutions. Python is a powerful and flexible tool in software development, and I am constantly improving my proficiency in this field.

During my free time, I engage in creating bots for the Telegram platform. These bots streamline various aspects of daily life by implementing useful functionalities. This activity allows me to blend my passion for programming with practical application in everyday life and explore new ways to automate tasks.

Furthermore, I am also focused on studying the field of Data Science using Python. I delve into concepts and techniques related to data analysis, machine learning, and statistics. This ongoing learning helps me develop skills in a rapidly expanding field and prepares me to tackle complex and challenging projects in the future.

Recently, I have started exploring QA (Quality Assurance) automation using Python. Understanding the process of automated testing and using the right tools to ensure software quality are essential aspects of developing reliable and efficient products.

This position provides me with an opportunity to apply and enhance my programming skills and explore various aspects of the IT domain. I am passionate about continuous improvement of my skills and contributing to the development of innovative and efficient solutions.

ABOUT ME

A young man passionate about IT, with solid programming knowledge and interest in development in the field of QA Automation. With a college graduate degree in computer science and a current focus on language study Python, I'm determined to contribute to the ensuring software quality and performance

EDUCATION

Course Studied

Center of Excellence in Computing and Information Technologies - Specialization: WEB Administrator

2019-2023

SKILLS

- PROGRAMMING LANGUAGES: PYTHON (IN STUDY COURSE), HTML, CSS, JS
- FRAMEWORKS AND LIBRARIES: DJANGO, REACT JS
- OPERATING SYSTEMS: WINDOWS, LINUX
- DATABASES: MYSQL, SQLITE
- OTHER KNOWLEDGE: GIT
- Ability to learn quickly and to adapt to new tasks and technologies
- The ability to work effectively in a dynamic work environment and under pressure
- Capacitatea de a gestiona eficient timpul și de a respecta termenele limită
- Abilități solide de rezolvare a problemelor și de analiză

LANGUAGE

Romina - High level
Russian - high level
English - Beginner level
